

June 9, 2017

The Crescent Community Club (CCC) has a long-standing history with humble beginnings in rural Central Oregon. We maintain an historic building on the Crescent Cut Off Road that was built in 1956.

During the harsh 2016-2017 winter, we experienced some damage to the roof of our building above our heating system.

We are seeking bids/quotes for repairs to the north corner of the roof. Specifically, we have been told we need a new vent pipe, collar, flue/flange for the heat exhaust.

If you are interested in providing us a quote for the job, please contact one of the CCC Heating Systems Committee members listed below so that we can set a date and time to meet with you at the building site.

In order to prevent further damage to our heating system and the building structure, we must have this work **completed prior to September 1, 2017** before damp fall and winter weather is upon us again.

We are a non-profit 501 (c) 3. We are able to provide you tax donation forms for any work provided to us free or at discounted rates.

Thank you for your interest and support of the Crescent Community Club.

Respectfully,

CCC 2017 Heating Systems Committee
